

How a country positioned itself

1965

Independence

No resources, no hinterland, no obvious reason to exist

1970s

The word chosen

"Clean, safe, corruption-free" — a promise nobody else was making

1980s-90s

The proof delivered

Rule of law, infrastructure, an efficient state

Today

The word owned

Multinationals still choose it for the reason it claimed

A nation claimed one word and spent sixty years proving it. The method is the same at any scale.
