

The five-step process: from the ground to the word

- 1**
▼
Know the competitive set
Who actually competes for your customer?
- 2**
▼
Map the customer's mind
What word do they already associate with the category?
- 3**
▼
Evaluate every way to stand out
Which differences can you actually win?
- 4**
▼
Find the open slot, and the trap
Which word is free, and which only looks free?
- 5**
Decide the position and the plan
The one thing you will be known for, and the steps to hold it

Each step answers the question the last one raised. Author method.
